

STANDARD

SHALLOW

PENINSULA

CUBE

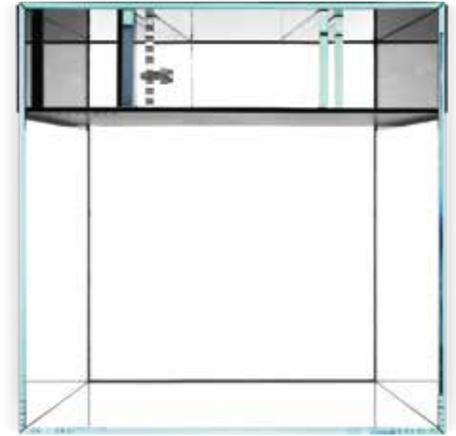

Suitable for saltwater or freshwater use, the Dual series can be customized with a full line of add-on accessories to support a successful reef aquarium.

These aquariums feature everything that is loved about our standard rimless aquariums: 45° precision cut mitered edges, high-grade unobtrusive silicone for security and quality viewing plus low iron and 91% Diamant glass.

INSIDE THE SYSTEM

Featuring a sleek, innovative built-in filter eliminating the need for an additional piece of aquarium equipment. The triple filtration chamber includes a coarse aquarium sponge, quality bio-media and a reliable water pump to provide consistent flow to the entire system.

Adjustability

A built-in water level adjustment baffle allows the user to raise or lower the height of the water level in the first chamber.

Surface skimming

Lowering the water level adjustment baffle will clear any surface build up and detritus for an ultra clear aquarium.

Wet dry filtration

Adjusting the water level will fully submerge or semi-expose filter media when used in conjunction with the Media Tower.

COMPLETE THE SYSTEM

Ultum Nature Systems marine aquarium accessories are designed to work in conjunction with UNS Dual All-In-One Aquariums. These accessories include convenient interchangeable filter media organizing options, auto top off units and a full refugium system.

① CHAMBER 1

- Filter Sponge
- Intake Guard
- Filter Bag Conversion Kit
- Filter Bag Replacement
- Media Tower
