

ULTUM NATURE SYSTEMS

# THE ULTUM NATURE SYSTEM

Ultum Nature Systems strives to provide industry leading, premium grade aquarium goods with the everyday hobbyist in mind. Versatile and sleek, our innovatively designed product line provides the perfect groundwork for various styles of aquarium keeping. Featuring an artistic and user-friendly approach, our essential items promote the success of a healthy freshwater ecosystem. From our timeless ultra-clear rimless aquariums to our healthy collection of aquatic plants and quality aquarium equipment, we're on a neverending mission to improve and expand our product lineup to ensure we'll have you covered from A to Z.

STEP  
1

## HARDSCAPE LAYOUT

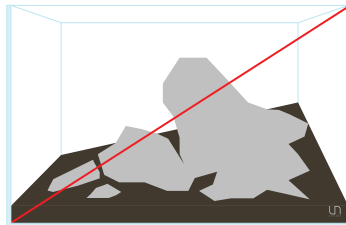

Inspired by mountainous landscapes, an intricate stone layout is created using Elephant Skin Stone. Each stone is meticulously placed upon a high slope of aquarium soil creating additional depth in this triangular aquascape layout. Beautiful characteristics and textures found in Elephant Skin Stone provide a solid foundation for the addition of aquatic plants.

**HIGH-BANKING SUBSTRATE**

**TRIANGULAR LAYOUT**

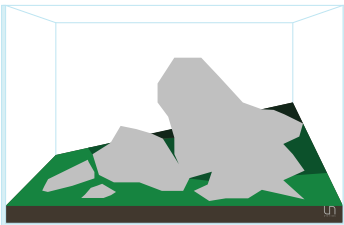

STEP  
2

## PLANTING

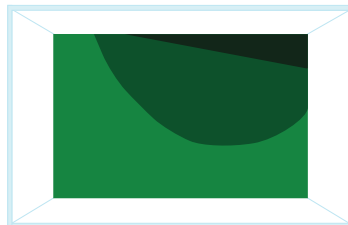

A total of 8 different aquatic plant species are chosen for this aquascape. Size, growth pattern, leaf shape, texture and color all play an important role in ensuring the final look is both visually pleasing and cohesive throughout. Using stones as natural “dividers” a foreground, midground and background can be visualized and referenced when planting.

### DIVISION BY HARDSCAPE

### PLANTING IN SECTIONS

# RIMLESS AQUARIUM

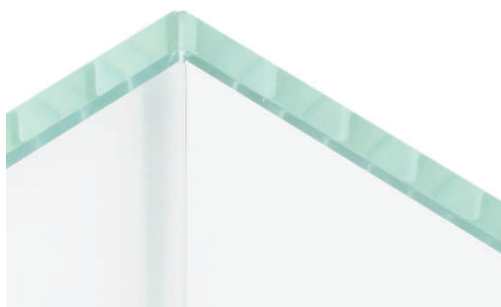

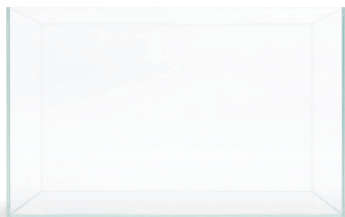

## 75P STANDARD AQUARIUM

Featuring modern and minimalist construction, UNS rimless aquariums are constructed from 91% clarity diamant glass and are bonded together with high-grade German silicone glue. Meticulous care is taken to blend the panels of glass together seamlessly in a beautiful 45° mitered edge resulting in clean aesthetic and unlimited room for depth and creativity – an aquascaper's dream.

## SUBSTRATE

### CONTROSOIL

A quality aquarium plant soil. Created from a proprietary blend of natural soil and volcanic ash, Controsoil balances water properties to optimal levels for lush aquatic plant growth and tropical fish health. With little to no ammonia release and buffering qualities, Controsoil is also loved for leaving water crystal clear from the beginning. A healthy jumpstart and thriving ecosystem makes Controsoil a perfect substrate.

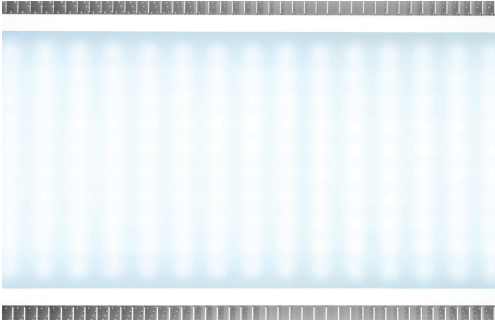

# LIGHTING

## TITAN 1 RGB LED LIGHT

200 RGB LED bulbs lined up on a sleek aircraft-grade aluminum body gives birth to the Titan 1 LED lighting solution for planted aquariums. Aquascapes are brought to life with vivid coloration. Water clarity is apparent and light spread is maximized efficiently. Powered by advanced LED technology, Titan 1 emanates minimal heat and encourages stable, consistent temperatures for livestock below while saving energy as a low consumption unit.

# HARDSCAPE

## ELEPHANT SKIN STONE

Characterized by its strong texture that results from years of weathering and natural erosion, Elephant Skin Stone also features occasional depressions and concave areas that add to its natural appeal. Unlike Seiryu Stone and other aquarium stones, Elephant Skin Stone offers these coveted characteristics with rounded edges. This provides a softer look that works well with many aquatic plant species. Light in color, it is sure to contrast well and is a solid choice for any planted aquarium.

STEP  
3

**TANK:** UNS 75P 36 Gallons

**SUBSTRATE:** UNS Controsoil Black Fine

**LIGHTING:** UNS Titan 1 RGB LED for 7 hours

**CO2:** UNS Dual Gauge at 6.8pH for 7 hours

**FILTRATION:** UNS Delta 120

**HARDSCAPE:** Elephant Skin Stone

**MAINTENANCE:**

40% water change once a week

**PLANTS:**

Eleocharis Acicularis Mini

Eleocharis Vivipara

Echinodorus Tenellus

Hygrophila Araguaia

Cryptocoryne Wendtii 'Indo' Brown

Cryptocoryne Affinis

Riccardia Chamedryfolia

Nymphaea Stellata

**FAUNA:**

*Paracheirodon Axelrodi*

*Otocinclus* Sp.

*Caridina Multidentata*

**SETUP DATE:** May 2019

**PHOTO DATE:** July 2019

An underwater scene with a green tint. Numerous small fish are swimming in the upper half of the frame. In the lower half, there are large, dark rocks and some green seaweed or plants. The overall atmosphere is serene and natural.
